CO-ORDINATING COMMITTEE

Export of Bearings to Russia

Memorandum by the United Kingdom Delegation

The United Kingdom authorities have received an application for a licence to export to Russia the 150 bearings described below, total value \$5,406. The Russian importing agency is MACHINOIMPORT, Moscow.

4	N. 4391
51	N. 4496
12	N. 4567
12	N. 4579
47	N. 4660
24	N. 5290

These bearings which are covered by Item 1601 have a tolerance of ABEC 5 and have been subjected to special heat treatment.

2. They are part of an order for spare parts, value \$280,000 required to service 167 non-embargoed diesel engines which were supplied to Russia from 1953-1957 for use in electrical generation.

3. The United Kingdom authorities are satisfied that the types and quantities are reasonable for the purpose stated, and consider that diversion to any strategic use would be unlikely.

4. They wish, therefore, to approve the export in accordance with paragraph (b) of Annex B to Document 1473 and would be grateful if comments could be made by July 27.

United Kingdom Delegation,

Paris.

July 15, 1959.
